

## About Viogene's unique design — EasyLid™

Viogene now publishes the new patent design for EasyLid™ of Mini Column.

With EasyLid™, you can keep it to prevent contamination during the procedure.

You can also remove the EasyLid™ whenever you like for more convenience issues, such as for high throughput applications.

How to remove the EasyLid™? It's very easy and simple.

1. Just use your fingers to nip the arm between cap and column's body.
2. Twist and pull the cap to take off it.
3. The EasyLid™ is removed.
